NEW FROM Intelitek

CHROMEBOOK & MAC SUPPORT

REMOTE LEARNING FOR ALL

WWW.INTELITEK.COM

Intelitek's effort to support remote learning for schools has expanded to include __all platforms__. Now, you can access the curriculum AND the **simulation software** from a browser.

This provides a seamless solution for non PC users

SUPPORT FOR INTELITEK SIMULATION SOFTWARE ON ALL PLATFORMS INCLUDING CHROMEBOOKS, MACS, LINUX AND MORE

How does it work?

Students will be allocated a license key and access instructions to a virtual machine. Once online, they can access the learning software they need from any platform. Students can access the software for 6 months as they progress through and review the courseware. Licensing is flexible for the number of students and applications your school uses.

Starting at $30 for one student down to $15/seat for the entire class

CNCMotion® **RoboCell**® **PneuMotion**® **HydraMotion**® **PLCMotion**® **OpenCIM**®
