

NOW IS THE TIME TO STEP UP YOUR MANUFACTURING PROGRAM!

intelitek 

THERE ARE GRANT OPPORTUNITIES FOR EDUCATORS

Manufacturing, driven by industry 4.0, is on the rise, and recent worldwide events are promoting more local manufacturing.

There is government funding to support training initiatives. Grant opportunities to build new or upgrade existing manufacturing or mechatronics programs are available now.

In conjunction with a partnership with Thomas P. Miller & Associates, we can help you define your plan and submit a grant application that will take your CTE training to the next level.

CREATIVE CONCEPTS

- We have defined a state-of-the-art, forward-thinking Industry 4.0 training and certification program
- Have the curriculum and professional development to enable schools to roll out new training rapidly
- Proved support to assist schools in finding funding from grants offered in the US by state and federal programs

PROBLEM SOLVER

- Create compelling stories and craft a successful proposal with a sense of urgency while instilling confidence in your college or consortium's ability to transform the workforce in your region
- Develop a research-based strategy and implementation plan
- Scale training and credentialing appropriate to pandemic norms and for the future
- Enhance your capabilities with professional, experienced staff ready to tackle research, writing, implementation, and evaluation
- Evaluate success in ways that demonstrate impact and improved effectiveness
- Resource for data collection and performance reporting

THOMAS P. MILLER & ASSOCIATES 

Is your school ready to take a leap forward and support the local industry's need for qualified, Industry 4.0 personnel?

Call us today, and we will help you step up!
